

SPRINT-PEANUT select.line

Drilling and PEANUT® insertion machine

The SPRINT-PEANUT select.line machine is designed for drilling and driving PEANUT® connectors by Intelligent Fixings. With PEANUT® connectors, furniture carcasses and frames can be plugged together quickly, easily and without using tools. In addition to PEANUT® connectors, standard wooden dowels can optionally be driven by the machine.

Basic equipment

- ✓ 4 working fields
- ✓ max. stock width: 1,300 mm (51")
- ✓ Horizontal drilling station with one drilling spindle
- ✓ Glue injecting and PEANUT® insertion station
- ✓ KOCH WOP – parametric programming
- ✓ 3 pneumatically lowerable stock stops (side and center fences)
- ✓ Premium Remote Support – Service via internet
- ✓ Low voltage supply
- ✓ NC-positioning of height adjustment (Z-axis)

Advantages of the PEANUT® connector

- ✓ A self-clamping, invisible connector
- ✓ Creates an incredibly strong joint
- ✓ Quick and simple assembly of cabinets
- ✓ Packs flat when pre-inserted
- ✓ Ideal for boring and insertion machines
- ✓ Can be reassembled many times

Find out more
about PEANUT®

SPRINT-PEANUT select.line

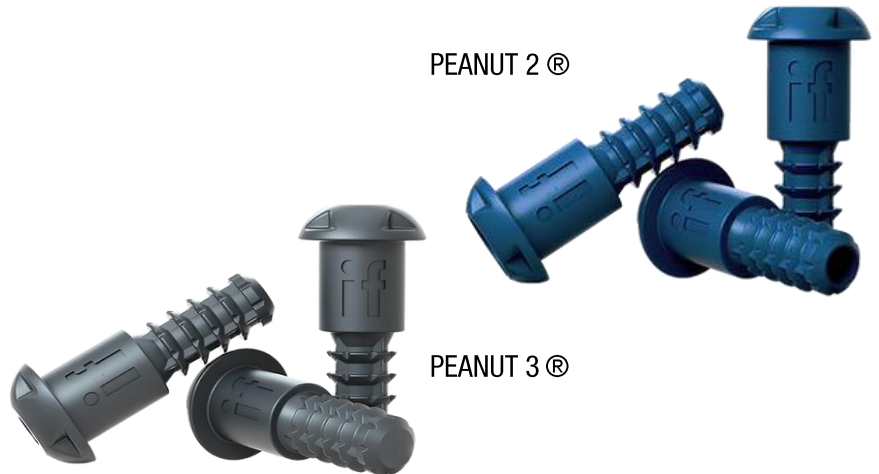

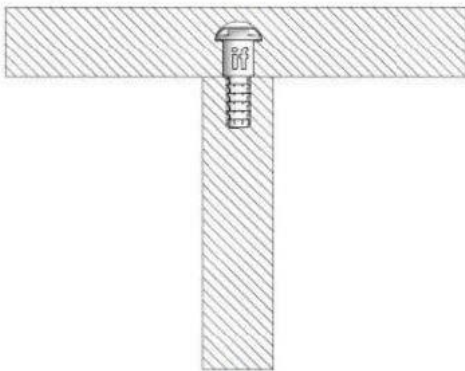

Drilling and PEANUT® insertion machine

The PEANUT head has been specially designed to maximize ease of assembly and joint strength. Due to its dome shape, the PEANUT head smoothly slides along the slot created by the T-shaped PEANUT Cutter.

In assembly, the PEANUT head rides over the lip of the PEANUT slot and slides to the end, this action creates a strong clamping force, pulling the two panels together from the inside.
